Competition set

Version : 2019.Feb.21.003_v1.0
Author : M. Teusch marc@makeit.lu

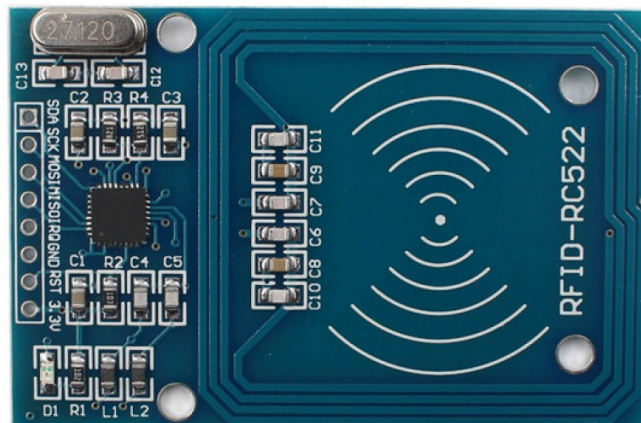

Competition set

The competition set handed by make it asbl contains the following items :

1 x complete Makeblock Ultimate 2.0 (10 in 1) robotics kit

1 x RFID reader (Arduino compatible) RC-522 (or similar)

1 x cable (length may vary)

All the software must be downloaded by the team itself under makeblock.com. Please note that there's no restriction as to coding the robot. All languages are accepted, but the code needs to be reviewed by the jury before entering competition (see ruleset).

General rules of the competition set

The team mentor will take hold of the competition set and with his/her signature engage the team to replace any missing or broken parts of the kit after competition is finished.

The value of the kit is estimated to 500,00€, where missing parts may be replaced separately, if possible. The kit will be delivered in excellent shape and no reconditioned parts will be included. After receiving the kit, the mentor is responsible to check the set for entireness, no claims will be taken after the handing out.

While being in the possession of the kit, the team's mentor is responsible for its state and content. No spare parts are available from make it asbl, if there are parts missing, the mentor has to provide a third party to get adequate replacement. On address is our partner, electronic shop (www.electronic.shop.lu) in Niederanven.
